ABOUT ME

I have been working in IT for over 3 years, gaining experience mainly as a Front-End Developer, while also expanding my skill set into various other roles. In many cases, I had to start from scratch and learn quickly and look for ways to incorporate my previous experience into new areas of work.

I've worked on large, complex projects maintained simultaneously by multiple team members, as well as on projects entirely dependent on me - where I had to come up with the concept and build everything from the ground up.

I believe that the more difficult a problem is, the more we can learn from working on its solution.

EXPERIENCE

ReCodeIT Junior Full-Stack Developer

10.2021 - 05.2022

7 months

Independent development of new features for the online service Dyktanda.pl:

- Logical Games – designed and created the UI, developed and implemented game mechanics, built a backend system for score saving, and added game and level management tools for the website administrator within the CMS.
- Discount Codes – developed tools for creating and managing discount codes in the CMS, designed the website UI for code usage, and integrated the system with the payment gateway.
- Mailing Platform Integration – implemented seamless integration with the mailing platform to enhance communication capabilities.

React, TypeScript, MongoDB, Express

Printbox Junior Front-End Developer

05.2022 - 07.2024

2 y 2 m

- Creating redesigns of buying paths according to Figma designs.
- Creating configuration scripts that manage the behavior of buying paths elements and adjust the availability of product attributes.
- Adding analytics, implementing A/B testing, writing unit and automated tests.
- Creating reusable components with implemented ability of deep customization by clients via CMS.
- Developing company websites, including SEO optimizations.

React, TypeScript, Jest, Cypress, Next.js. Wordpress, PrestaShop, Strapi.io, jQuery

Working on applications related to project funding directly connected to the IT sector:

- Participation in the preparation of an application to the Małopolska Centre for Entrepreneurship for funding experimental development work in the field of computer software, as part of the “European Funds for Małopolska 2021-2027” competition, Measure 1.1: Research and Development Projects of Enterprises. Project title: “Zakupy360.ai – an open sourcing platform for B2B enterprises.” Work conducted using the application generator within the IGA system.
- Participation in the preparation of an application to the Polish Agency for Enterprise Development for funding participation in international trade fairs and economic missions in the USA, Europe, and Taiwan, as part of Measure FENG 2.25: Promotion of the Brand of Innovative SMEs. Project title: “Participation of WILK ELEKTRONIK S.A. in events supporting product promotion and the development of export activities.” Work conducted using the application generator within the LSI system.

LSI, IGA

Freelance Full-stack developer / UI Designer

12.2024 - 02.2025

4 months

Creating a website for Famille, a company specializing in providing caregivers for seniors.

The work included designing graphics in Figma, developing the website (<https://www.famille.pl/>), performing SEO optimizations, and building a custom CMS from scratch. The CMS allows managing website content, adjusting customization settings, enabling or disabling website components, uploading and updating images, managing SEO.

The website is available in five languages.

React, TypeScript, MongoDB, Express

Freelance Systems Analyst

02.2025 - 04.2025

4 months

Creating user requirements and functional specifications for industry-specific software providing services electronically in a SaaS model.

Collecting necessary data for the specification based on the analysis of available market tools and discussions with the client.

Developing the specification based on the gathered data and several years of programming experience.

The project is still ongoing
